SKILLS

- Java 17
- Spring Boot
- Microservices
- Kafka
- Hibernate / JPA
- PostgreSQL
- MongoDB
- Docker
- Git
- JUnit

Experience

Software Engineer

FinServe Corp | 2022 - Present

• Developed and maintained critical microservices for a loan processing system using Spring Boot and Apache Kafka.
• Refactored legacy monolithic modules into independent, scalable services, improving system maintainability.
• Implemented comprehensive unit and integration tests using JUnit and Mockito, increasing code coverage to 90%.
• Collaborated with cross-functional teams to define API contracts and deliver features on schedule.

Java Developer

CodeCraft Labs | 2021 - 2022

• Implemented secure authentication and authorization modules using Spring Security and OAuth2/JWT.
• Designed and optimized complex SQL queries and stored procedures for reporting modules, handling large datasets efficiently.
• Participated in agile ceremonies and contributed to continuous improvement of development processes.

Projects

PayEasy API

A secure payment processing gateway integration supporting multiple providers and currency conversion.

LogSentinel

Centralized logging and monitoring service for distributed applications using ELK Stack.
