PROFILE

Full Stack Developer bridging the gap between robust web platforms and AI innovation. Strong focus on modular system architecture, SOLID principles, and low-level design. Experienced in building role-based applications and integrating advanced AI workflows like Retrieval-Augmented Generation (RAG).

TECHNICAL SKILLS

Web Technologies:	MERN Stack (MongoDB, Express, React, Node), FastAPI, Spring WebFlux
Languages:	Java, Python, JavaScript, C, C++
AI/ML:	RAG, Agentic Workflows, FAISS Vector Indexing, AD-MoE Systems
Tools:	Git, GitHub, Docker, Visual Studio Code

EXPERIENCE

Software Engineer Trainee

Coding Maxima | Late 2025 - Present

- Driving structure and low-level design improvements across Java, C++, and Python course modules.
- Refactoring codebase explanations to emphasize clean code practices and SOLID principles.

Full Stack Developer Intern

Aditya University | May 2025 - July 2025

- Developed a responsive student management application using FastAPI, MongoDB, and JavaScript.
- Tested features with real users across multiple devices and managed version control via GitHub.

PROJECTS

College Intranet Portal | MERN Stack

- Architected a centralized academic portal for managing coursework and timetables with secure role-based access control.
- Refactored the legacy backend into modular, SOLID-compliant services for better scalability.

ClassMate - Productivity Web App | Python, FastAPI, MongoDB

- Built a distinct, offline-first full-stack productivity tool for students.
- Integrated modules for task management, attendance tracking, and an AI-driven chatbot assistant.

Reactive Stock Service | Java, Spring WebFlux

- Implemented an asynchronous, non-blocking stock service using Project Reactor.
- Developed comprehensive testing suites and technical documentation for deployment.

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning

Aditya University | 2023 - 2027
